hulumi  
collection

HULUMI offers complete quality wood solutions in the catering industry that combine both stylish forms and intelligent ways for usage. In Estonia, the birthplace of Hulumi, oak and ash have been valued as a raw material for centuries. We are delighted to share those values with you.

The product selection in this catalog is being arranged by the fields of application. The photos attached will enrich the overview of the possible solutions. In developing products, we base on standard sizes of the tools used in the catering industry (GN dishes)..

The coating is marked by product:

Oiled

Stain Havana Black, lacquered

Whitewashed, lacquered

Driftwood

In our made-to-order production, we also offer custom-made products according to the volume and the technical specifications.

For product customization we offer laser engraving and other different printing techniques.

In compliance with your inquiry, the price quote will be sent to you personally.

Our products are not intended for use in the dishwashing machines unless marked differently in the product specification.

We recommend from time to time to oil the already oiled products. This will help to increase the lifespan and make it visually fresher.
